

# SAMUEL ARANDIA

## SYSTEMS ANALYSIS AND PROGRAMMING TECHNICIAN

### ABOUT ME

I am a systems analysis and programming technician with one year of experience, trained to perform the software development cycle, incorporating requirements analysis, design, programming, testing and implementation of solutions, as well as their maintenance. Trained to meet the technical quality standards and requirements assigned. My skills include logical thinking, teamwork, written communication and self-learning. I am looking for a challenging and dynamic position to continue adding experience and knowledge.
